

January 31, 2023, Green Dallas was preparing for a transition with one of its newest distribution customers involving the **development of system connections** that included complex order fulfillment processes.

That same day an ice storm hit Texas, shutting down roads and businesses statewide. The outbound order plan came to a complete halt as order requests piled up for days.

On February 2nd, operations resumed with a backlog of 60,000 cases to be shipped. The workload seemed overwhelming, and it was evident that additional help was needed.

210,000 boxes handled in 15 days

Twenty-six 53' foot trailers shipped

13 containers were stripped and received

Over 1,100 pallets built

THE SOLUTION

The **Green network power**. Within 24 hours, green employees from all over the country reunited on the ground to assist with the situation. From systems to connections to forklifts to scanners, experts came together to remove any obstacles to meeting the goal.

Dallas, Texas is a top-ranked market for supply chain transportation, warehousing & distribution. Green Worldwide Shipping has expanded its commitment to servicing clients with newly bonded Container Freight Station (CFS) in Dallas, Texas.
